# Анализаторы качества воды Global Water

## Технические характеристики

## WQ101 Temperature Sensor

Rugged Water Temperature Sensor

### Features

- Fully encapsulated electronics
- 4-20 mA output
- Marine grade cable with strain relief

### Description

Global Water's WQ101 Temperature Sensor is a rugged and reliable device for highly accurate submersible water temperature measurement. The sensor's probe is molded to 25 ft of marine grade cable, with lengths up to 500 ft available upon request. The WQ101 has a two-wire configuration for minimum current draw. The unit's electronics are completely encapsulated in marine grade epoxy within a stainless steel housing.

### Applications

Ideal for stream and lake monitoring, aquaculture studies, baseline analyses, mitigation monitoring, and other environmental applications.

### Specifications

|                   |  |
|-------------------|--|
| Output            | 4-20 mA  |
| Range             | -58 to +122° F (-50 to +50°C)  |
| Accuracy          | ±0.2°F or ±0.1°C   |
| Maximum Pressure  | Open Water: 0 to 200 psi<br>Online: 50 psi   |
| Operating Voltage | 10 to 36 VDC   |
| Current Draw      | Same as sensor output  |
| Warm-up Time      | 5 seconds minimum  |
| Operating Temp    | -58 to +212° F (-50 to +100°C)   |
| Size of Probe     | Open Water: 3/4 inch dia. x 4 1/2 in long (1.9 cm dia. x 11.4 cm long)<br>Online: 1.7 inch dia. x 8 in long (4.3 cm dia. x 20.3 cm long) |
| Weight            | Open Water: 8 oz (227 g)<br>Online: 9.4 oz (272 g)   |

### Ordering & Options

| Order No. | Description  |
|-----------|--|
| WQ101     | Temperature Sensor for Open Water (includes 25 ft cable)             |
| WQ101-O   | Online Temperature Sensor (with 3/4 inch NPT thread and 25 ft cable) |
| WQEXC     | Extra Sensor Cable, per foot (up to 500 ft)                          |

## WQ201 pH Sensor

Rugged Water pH Sensor

### Description

Global Water's WQ201 pH Sensor is a rugged and reliable water pH measuring device. The pH transmitter is mounted on 25 ft of marine grade cable, with lengths up to 500 ft available upon request. The sensor's output is 4-20 mA with a three-wire configuration. The WQ201's electronics are completely encapsulated in marine grade epoxy within a stainless steel housing. The unit also uses a removable shield and replaceable pH sensor element for easy maintenance.

### Record and Control

As with all of Global Water's 4-20 mA output sensors, you can add recording and control capabilities to the WQ201 with the GL500 Datalogger and the PC300

### Features

- Submersible pH measurements
- Fully encapsulated electronics
- 4-20 mA output
- Marine grade cable with strain relief
- Stainless steel housing
- Replaceable pH element

Controller. The GL500 (on page 122) connects to the pH sensor's 4-20 mA output to record data, and the PC300 Controller (on page 132) connects to the sensor's output to control pumps or alarms.

### Applications

Ideal for stream and lake monitoring, aquaculture studies, baseline analyses, mitigation monitoring, and other environmental applications.

### Specifications

|                       |  |
|-----------------------|--|
| Output                | 4-20 mA  |
| Range                 | 0 to 14 pH   |
| Accuracy              | 2% full scale  |
| Maximum Pressure      | 40 psi   |
| Operating Voltage     | 10 to 30 VDC   |
| Current Draw          | 5.5 mA plus sensor output  |
| Operating Temperature | 23 to +131°F (-5 to +55°C)   |
| Warm-up Time          | 3 seconds minimum  |
| Size of Probe         | Open Water: 1 1/4 inch dia. x 10 in long (3.2cm dia. x 25.4cm long)<br>Online: 2 inch dia. x 12 in long (5cm dia. x 30.5cm long) |
| Weight                | 1 lb (454 g)   |

### Ordering & Options

| Order No. | Description   |
|-----------|---|
| WQ201     | pH Sensor for Open Water (includes 25 ft cable)           |
| WQ201-O   | Online pH Sensor (with 1 inch NPT thread and 25 ft cable) |
| 00-449    | pH Sensor Replacement                                     |
| WQEXC     | Extra Sensor Cable, per foot (up to 500 ft)               |

Please call us for calibration standards.

### Introduction to Water Quality Monitoring

In environmental waters, water quality is degraded when pollutants in the water cause conditions to exceed the aquatic system's ability to balance the changes. Two major categories of water pollutants include: point source pollutants from specific sources such as industrial pipes; and diffuse land-based non-point source pollutants carried to water bodies by runoff.

In order to identify, control, and remediate pollutants, water quality monitoring can be conducted in a variety of ways to meet many purposes. Monitoring can occur: continually at fixed sites to characterize waters and identify changes over time; at select sites on an as-needed basis to identify specific conditions; on a temporary basis to identify emerging problems; at random sites to gather information for broad programs; or on an emergency basis to respond to spills. Increasingly, monitoring efforts are aimed at determining the condition of entire watersheds to address the impact of non-point source pollutants.

Data that is collected and shared helps to inform pollution control and remediation plans, especially in cases of watershed-wide decision making. The EPA's STORET

is one of the largest online systems for ambient water quality data. Various entities collect and enter data into the database, and raw data can be accessed and used for a variety of purposes. The EPA is currently updating STORET to address developing technologies and provide users with more flexibility in working with online data. The next generation site is tentatively called the Water Quality Exchange.

## WQMS Water Quality Monitoring System

System for Monitoring Multiple Water Quality Parameters

### Description

Global Water's WQMS Water Quality Monitoring System allows you to monitor multiple water quality parameters with a fully integrated, easy to use, economical system. The standard system includes our multichannel datalogger (featuring 7 analog channels and 2 digital channels for data recording) and four of our rugged 4-20 mA water quality sensors for measuring water temperature, pH, conductivity, and dissolved oxygen. To customize the WQMS for your application, you can select up to three more analog sensors and up to two digital sensors to monitor additional parameters such as turbidity, ORP, water level, wind speed/direction, rainfall, and more.

#### Smart Water Quality Data Recorder

The WQMS's water quality data recorder features 7 analog channels, 2 pulse channels, and USB and serial communication ports. The durable and powerful datalogger is enclosed within a sturdy weatherproof case. The unit will operate for several months before its internal 12VDC battery requires recharging. Please see the GL500-7-2 on page 122 for additional information.

#### Powerful PC and PDA Software

The WQMS includes Windows™-based Global Logger II software, which makes accessing stored data and setting options easy. The software provides many useful features, such as real time readout, measurement interval and engineering unit selection, station ID setting, and sensor calibration. The WQMS also includes Windows™ CE-based PDA software for simple data collection in the field. Data downloaded from the recorder can easily be opened in any PC spreadsheet program for analysis and graphic presentation.

#### Rugged Water Quality Sensors

The WQMS comes standard with four rugged and reliable 4-20 mA water quality sen-

sors, including our water temperature sensor, pH sensor, conductivity sensor (with a 0 to 5000µS range standard), and dissolved oxygen sensor. Each sensor is mounted on 25 ft (7.6 m) of marine-grade cable, with lengths up to 500 ft (152.4 m) available by special order. The sensors' electronics are completely encapsulated in marine-grade epoxy within a stainless steel housing. Each sensor outputs a 4-20 mA signal. Please see the WQ101, WQ201, and WQ301 starting on page 60 and the WQ401 on page 63 for more detail about these sensors.

#### Remote Communication Options

To add remote communication capabilities, select the GL500-Mod Modem Package for telephone modem communications (see Ordering & Options) or the RM100 for radio communications (see page 126). We also offer solar panels and a battery charger to support your WQMS installation. See the Accessories table on the opposite page for additional information.

#### Customize for Your Application

To customize your WQMS, you can select up to three additional analog sensors and two digital sensors from Global Water's line of rugged water quality, weather, level, and flow sensors. Please see Ordering & Options on the next page and the sensors in this document for additional information.

If you require a unique water quality monitoring system to meet the needs of your specific application, Global Water can work with you to design a factory-integrated custom system. Please contact Global Water regarding this option.

### Applications

Ideal for stream and lake monitoring, aquaculture studies, baseline analyses, mitigation monitoring, and other environmental applications.

## WQMS Water Quality Monitoring System

### Features

- Monitor temperature, DO, pH, conductivity, and 5 additional parameters at the same time
- High quality, rugged sensors
- Battery powered for remote locations
- User-friendly Windows™ and Windows™ CE-based PDA software included
- Four sample modes: timed, 10 times per second, logarithmic, and exception
- Both USB and serial communication ports
- Rugged, lockable, weather resistant enclosure

### Specifications

#### Datalogger

|                       |   |
|-----------------------|---|
| Memory                | Non-volatile flash memory   |
| Power                 | Voltage: 7.2 VDC min. to 24.0 VDC absolute max.<br>Standby Current: 70µA typical<br>Logging Current: 5mA typical + sensor current   |
| Analog Sensor Inputs  | 4-20 mA (0-5 VDC as factory option)<br>Resolution: 12-bit, 4096 steps<br>Channels: 7 input channels + battery voltage monitor<br>Sensor Warm-up Time: Programmable, 0-60 sec              |
| Digital Inputs        | Two independent pulse counters<br>Maximum Input Voltage: 24VDC<br>Maximum Frequency: 100Hz<br>Minimum Pulse Width: 2mS<br>Maximum Count: 65,535 (16-bit)                                  |
| Sample Now Input      | Sample-on-demand input, software enabled<br>Maximum Input Voltage: 24 VDC<br>Minimum Pulse Width: 2 mS  |
| Sample Modes          | Fixed interval programmable from 1 sec to >1 yr<br>High speed 10 samples per second<br>Logarithmic sample rate (approximation)<br>Exception (log only on deviation from previous reading) |
| Storage Capacity      | 40,879 recordings for all inputs plus time stamp  |
| Data Overwrite        | Select memory wrap or unwrap (unwrap will stop logging once memory is full)   |
| Communication Ports   | RS-232 DB9 or USB Type B  |
| Selectable Baud Rates | 9600, 19200, 28800, 38400, 57600, 115200  |

|                       |   |
|-----------------------|---|
| Clock                 | Synchronizes to user's computer                                   |
| Operating Temperature | Industrial, -40 to +185°F (-40 to +85°C) (battery may not apply)  |
| Enclosure             | Expanded UV protected PVC<br>9 x 7.5 x 4.5 inch (23 x 19 x 11 cm) |
| Battery               | 12 Volt, 2.2 A/hr, rechargeable (gell cell)                       |
| Weight                | 3.5 lbs (1.6 kg)  |

#### Global Logger II Software

|               |   |
|---------------|---|
| Compatibility | Microsoft's Windows™ 98, ME, 2000, NT, XP, and Vista  |
| Features      | Tabular Display/Printout; data in standard spreadsheet format (CSV); programmable alarm start and stop times; field calibration software included |

#### Water Quality Sensors

Please see the WQ101 Temperature Sensor, WQ201 pH Sensor, and WQ301 Conductivity Sensor starting on page 60 and the WQ401 Dissolved Oxygen Sensor on page 63 for specifications.

"The stone in the water knows nothing of the hill which lies parched in the sun."

– African Proverb

### Ordering & Options

#### Water Quality Monitoring System

| Order No.         | Description                                 |
|-------------------|---|
| WQMS <sup>1</sup> | Water Quality Monitoring System             |
| WQEXC             | Extra Sensor Cable, per foot (up to 500 ft) |

1) The standard unit includes a datalogger, temperature sensor, pH sensor, conductivity sensor (with a 0-5000µS range unless otherwise specified), and DO sensor. For a custom system, please call us.

#### Accessories

| Order No. | Description   |

## TB500 Series Online Turbidimeters

intuitive user interface features security code settings to prevent unauthorized tampering. A built-in diagnostic menu assists in troubleshooting.

### Versatile Outputs

The TB500 includes an isolated 4-20 mA current output that may be used for chart or data recording, remote monitoring, PLCs, or SCADA systems. Two user-selectable alarm relays may be connected to an autodialer or local alarm to notify you before dangerously high turbidity levels occur. Also included is an RS-485 digital output that may be interfaced with a Modbus system to link multiple units or to integrate the TB500 into your existing network.

### What's in the Box

Each TB500 turbidimeter is shipped fully calibrated and includes desiccant, an inline pressure regulator, a universal 100-250 volt power supply, and an operator's manual. The TB502 models also include a spare measuring cuvette with a light shield.

### Applications

Ideal for continuous measurement of turbidity in filtered water, raw water, final wastewater effluent, and industrial applications.

## CL500 Chlorine Analyzer

Online Meter for Free or Total Chlorine Measurements

### Description

The CL500 Free/Total Chlorine Analyzer is an accurate and reliable instrument for continuous online free or total chlorine residual measurement. The CL500 uses the reliable and economical, colorimetric DPD (N,N-diethyl-p-phenylenediamine) chemistry, proven to be the most accurate method for measuring free or total residual chlorine. With no troublesome mixing or pump components to wear out, the CL500 provides reliable operations with minimal maintenance.

The CL500's user selectable sample settings conserves reagents by allowing you to set the cycle time from 90 seconds up to 10 minutes. The low volume reagent and sample chamber saves on reagent costs and decreases water consumption. A removable sample cuvette allows for simple cleaning and maintenance, and the viewable sample chamber provides a clear view of the sample cuvette while the instrument is sampling.

The CL500 provides a programmable 4-20 mA output signal that may be used with one of our chart recorders for report-

### Features

- Proven colorimetric DPD chemistry
- Reliable, low maintenance design
- Range of 0 to 10 ppm
- EPA accepted method

ing purposes or to control a chemical feed system. There are also two user-selectable Hi/Low limit relays that can trigger one of our AD200 autodialers (page 138) or a local alarm system. The unit's compact and corrosion-resistant NEMA 4X (IP66) enclosure allows for a simple installation.

The CL500 comes with an inline pressure regulator, replacement tubing/cuvette kit (one year supply), a power supply, and an owners manual. Please note that reagents must be purchased separately.

### Applications

Ideal for monitoring and controlling the residual in water and wastewater treatment plants.

### Ordering & Options

#### Chlorine Analyzer

| Order No. | Description                  |
|-----------|------------------------------|
| CL500     | Free/Total Chlorine Analyzer |

#### Reagents & Replacement Parts

| Order No.     | Description                             |
|---------------|---|
| 09951GW       | Reagent Set for Free Chlorine (30 Day)  |
| 09952GW       | Reagent Set for Total Chlorine (30 Day) |
| 09953GW       | Reagent Set for Free Chlorine (60 Day)  |
| 09954GW       | Reagent Set for Total Chlorine (60 Day) |
